

## Details:

This app is created in the Django framework. This app is created for the purpose of accessing and taking details of Team who want to take ITSP. It is Developed by **Sachin Kumar**.

## Instruction to run:

Ensure that you have pip installed for django.

Open the whole directory in your text editor (Visual Studio Code is recommended).

Run the Command `python manage.py runserver` in Command line to run the app.

Open the link (<http://127.0.0.1:8000/>) in the browser which will appear after running your command.

To see created api add '/list' to you link. (<http://127.0.0.1:8000/list>)

## Features:

You can see three tabs in Navbar "All Teams", "Add Team", "Navigation".

In All teams:

You will see a table containing details of "Team Id", "Team Name", "Member". When you click on any team name you will redirect to a new page (link checked) which will contain the whole details of the team.

In Add Teams:

You will see a form which helps you to add your team by giving your details.

In Navigation:

You will see a table which contains one column of team id, if you want to see details in json format click on respected ID. It will show you the content. (api method(1.6)).

Hope this will help you to visit this app smoothly.
